

Profile

I am a technology-enthusiast software developer with a strong willingness to learn and analytical thinking skills. My focus is on continuously developing my technical skills and applying my knowledge in challenging projects. I value working in agile and collaborative teams to jointly develop efficient and innovative software solutions.

Core Competencies

- Extensive experience in developing database-driven web and client applications with C# and .NET
- Solid knowledge of relational SQL databases (e.g., MSSQL, MariaDB) and NoSQL databases (e.g., MongoDB)
- Expertise in CI/CD pipelines (Azure) and managing container solutions (Docker, Kubernetes)
- Certified Microsoft DevOps Engineer with a focus on automation and deployment
- Very good experience in agile working methods (Scrum) and close collaboration with interdisciplinary teams
- High results orientation, analytical thinking skills, and solution-oriented work approach

Anonymous User

Work Experience

- 08.2020 - Current
